

API Documentation: Get User Active Schedule

Endpoint Details

Endpoint Name: /v1/internal/auto-donation/:user_id/active-schedules

HTTP Method: GET

Authentication: Basic Auth + Signature Header

API Status: stable (v1.84.0)

Description

This endpoint retrieves all active schedules of auto donations that a user has set up. It returns a list of schedule IDs, their current status (ACTIVE or INACTIVE_INSUFFICIENT_BALANCE), and their category (e.g., SEDEKAH_SUBUH or DIRECT_TO_CAMPAIGN).

Query Parameters

user_id (required): The unique identifier of the user

Response Format

```
{
  "response_code": "000000",
  "response_desc": {
    "id": "",
    "en": ""
  },
  "meta": {
    "version": "v1.84.0",
    "api_status": "stable",
    "api_env": "stg"
  },
  "data": [
    {
      "id": 717,
      "status": "ACTIVE",
      "category": "SEDEKAH_SUBUH"
    }
  ]
}
```

Business Logic

1. Only retrieve schedules with status ACTIVE or INACTIVE_INSUFFICIENT_BALANCE
2. If schedule directly donates to campaign, set category as DIRECT_TO_CAMPAIGN
3. Join with auto_donation_statuses and auto_donation_program_categories tables
